

PRODUCT ADVISORY NOTICE

KEEPING YOU INFORMED OF PRODUCT CHANGES

To: All Customers, Sales Representatives and Distributors

Date: 4/1/2016

Subject: Change to positive pressure vent – 3K / 3J / 3D32 series products

This Product Advisory Notice is to alert you that Grayhill is changing the PTFE vents used in many assemblies based on obsolescence from W. L. Gore, the supplier of the current vent.

Description of Change

The vent on affected products is changing from Gore part number VE50308 to Gore part number VE80308.

Reason for Change

Gore is consolidating product lines and moving users of part number VE50308 to part number VE80308. Grayhill has evaluated and tested representative products with the change and determined that it is acceptable. The adhesive on the vent remains unchanged and the higher flow rate of VE 80308 does not impact the performance or specifications of our products. Higher flow rate results in faster pressure equalization during temperature changes which is considered a benefit.

Effective Date

The new vent part number VE80308 will be used in all assemblies starting May 15, 2016.

Part Numbers Affected

3J1005-200	3K012-4RC3AG	3K112-4RC3AG	

Custom designed products will be covered by change notices written specifically to those users.

Action Required

The test report is available upon request. Because the new vent meets the same specifications as the previous vent, no action is required. If you have any questions, please contact your Grayhill sales associate. If you are not the proper person in your organization to evaluate this change, please forward this Product Advisory Notice to the correct person.
